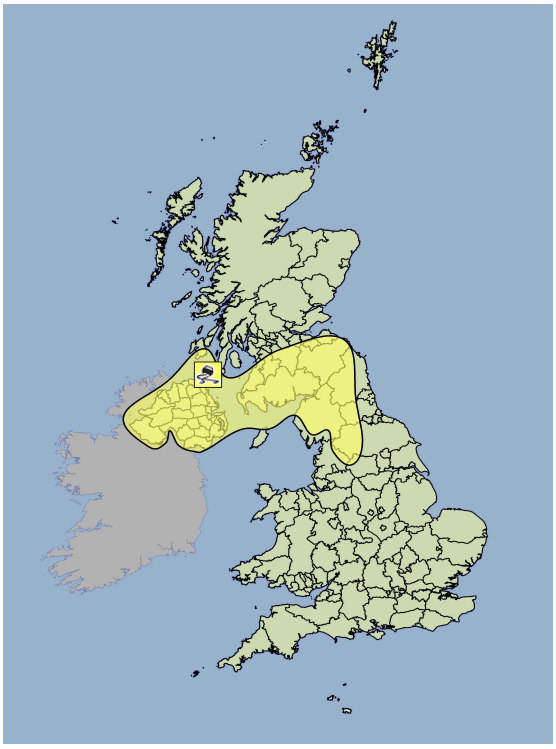
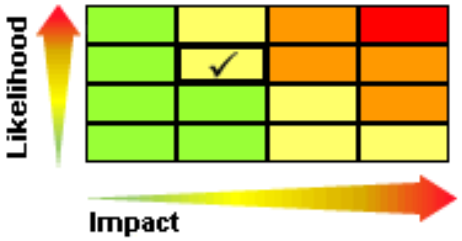
National Severe Weather Warning Service





Chief Forecasters Assessment
Following a cold, wet day, with snow in places, clearer conditions will extend east across most areas during the late afternoon and early evening. With roads chilled by the mix of cold rain and snow, they will fall below freezing soon after the cloud breaks. As there may not be time to treat all roads before this happens, there is an increased ice risk across the area.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **17:00 on Sat, 12th Dec 2015** until **10:00 on Sun, 13th Dec 2015**

As rain, sleet and snow clear eastwards later on Saturday afternoon and evening, temperatures will fall sharply under clearing skies and will allow widespread icy stretches to form on untreated roads and pavements. Freezing fog patches may be another local hazard.

Please be aware of the need to take extra care when walking, driving or cycling in the affected area.
